

## Application Instructions for Vinyl Decals with Transfer Tape

Read all directions first and watch tutorial videos on Youtube so you know exactly what you need to do and have all the right equipment with before you start.

**The decals that you have received will be in type setting and may not be in correct order please cut and separate first, then place them in the intended positions.**

- STEP 1: **Firmly** rub over entire area with a cloth, credit card / squeegee
- STEP 2: Cut out words / pictures if you would like to apply them in different positions
- STEP 3: Remove backing - lay decal face down with the sticky paper on the bottom and start at one corner -slowly peel off backing paper (non-sticky) to reveal your decal which should remain on the sticky paper (this will either be clear or masking tape colour)
- STEP 4: Hold 2 corners of the decal (it should now have been transferred onto transfer sheet) and stick to desired surface
- STEP 5: Rub firmly with cloth, credit card / squeegee
- STEP 6: Slowly peel off the transfer sheet to reveal your wall decal
- STEP 7: Enjoy your new artwork.
- **STEP 8: Take a photo to upload onto Dazzling Decals and Designs Facebook page <https://www.facebook.com/dazzlingdecals>, Tag us on Instagram @dazzling\_decals\_and\_designs or leave us a review on Facebook to receive a \$10 off voucher on your next purchase!**

**Please do not hesitate to contact us with any queries you may have.**

**admin@dazzlingdecals.com.au**

Please make sure the area you are applying to is wiped down and free from dust. Dazzling Decals wall stickers have been tested prior to listing, they work well on 90% of walls, however there are some reasons it may not stick:

- If your paint finish is satin/low sheen or high gloss
- If the paint is " Teflon" or " silicone" or have similar additives to make them " wash and wear " or " weather proof"
- Your paint is less than 6 weeks old and not completely dry.
- Your wall texture may be too rough or bumpy, such as concrete, cement and rendered walls, or suede effects
- Method of handling i.e. not pressing wall decal firmly enough to the wall.
- Dusty; rough; textured; oily; moisture surfaces will not be as effective.
